

Department Feature Requirements

Homestead Assisted Living | Initial feature list

01 HOUSEKEEPING

- Room assignments: Assign resident rooms to housekeeping staff, with a repeating schedule for routine cleans.
- Room clean checklist: Give staff a checklist for each room and let them mark items complete as they work.
- Requests and notes: Allow staff to enter maintenance requests or notes during a room clean; notify the appropriate people when submitted.
- Time tracking: Provide a timer or similar tool to track time spent on each room and assess time compliance.
- Deep cleans: Track the more detailed clean required when a resident moves out, and assign each deep clean to a staff member as needed.

02 DINING

- Menus: Upload menus and organize them by meal type.
- Resident orders: Let staff enter each resident's order, including whether the resident will dine in or wants a to-go tray.
- Kitchen workflow: Show kitchen staff incoming orders and special orders, with a way to mark each order complete.
- Ready alerts: Let kitchen staff alert the appropriate staff when orders are ready.

03 MAINTENANCE

- Requests: Provide a place to submit maintenance requests and upload photos.
- Task status: Let the maintenance crew update the status of each request through completion.

04 ACTIVITIES

- Calendar: Maintain an activity calendar and identify the building for each activity.
- Attendance: Select the residents who attended each activity.
